DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Remarks (pages 9-10), filed 2/8/2007, with respect to claims 1-21 have been fully considered and are persuasive. The rejection of claims 1-21 has been withdrawn.

Allowable Subject Matter

2. Claims 1-16 are allowed.

3. The following is an examiner's statement of reasons for allowance:

* Rejected claims have been amended to overcome the rejection under 35 USC 112, second paragraph, and 101;

* The present invention provides a new method, system and computer readable medium for modeling color behavior of a color device, wherein flexibility to the CMS is provided since the CMS can find the information it needs to generate a transform in the data structure itself, and by storing the characterization process in platform independent code any CMS can use it to generate color transforms regardless of the platform on which the CMS is running (see specification, page 4, paragraph [0009]).

Particularly, the new method, system and computer readable medium comprise the following features, which the prior art taken either singly or in combination does not teach:

- a measurement component comprising at least one of control signal data which is in device dependent coordinates and color coordinate data which correlates to said

control signal; and a characterization process component comprising platform-independent code for a characterization process based on the measurement component to produce a color behavior model for the color device (see independent claims 1, 5, 7 and 12);

- obtaining/measuring at least one of control signal data which is in device dependent coordinates and color coordinate data which correlates to said control signal; storing platform-independent code by which the measurement-only profile is used to generate a color transform (see independent claims 11 and 16).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
